Creating your individual style

Natural Granite

Facts:

- ◊ Each piece of natural stone is unique in character and has a timeless beauty that never goes out of style.
- ◊ A natural product with strong definable patterns and natural textures.
- ◊ Granite is one of the hardest stones next to diamonds and available in thousands of different colours.
- ◊ Durable and hard wearing suitable for use in kitchens, bathrooms or any work surfaces in the home or commercial applications.
- ◊ The durability of granite makes it suitable for outdoor use as well.
- ◊ Of all materials tested in a recent study, Granite bench tops retained one of the least amounts of bacteria after cleaning.
- ◊ Granite resists higher temperatures of heat, staining, scratching, chipping and acids
- ◊ Granite requires sealing only once, and is simple to maintain with household cleaners

Care and Maintenance:

- ◊ Granite is surface sealed as part of the Edstein Creative Stone production process.
- ◊ For the first 12 months simply use hot soapy water as your cleaner and then polish dry to a high gloss shine.
- ◊ After 12 months you can revitalise the shine of the surface by using a polish cream designed specifically for natural stone. Lithofin products are recommended.
- ◊ If any materials do happen to mark the surface these can be removed by applying specific Lithofin products.
- ◊ Do not use cream cleansers or abrasive scrub pads on natural stone.
- ◊ Avoid leaving oil residue on Granite benchtops for long periods of time, clean up after cooking to maintain Granite's natural appearance
- ◊ Avoid using harsh chemicals such as bleach & acids on Granite
